**Erratum**

The paper entitled, "Continuous Ambulatory peritoneal dialysis in the United States: A three-year study," by Karl D.

**Fig. 2.** Probabilities of dying while on CAPD or within 2 weeks of transfer (—); a transfer to hemodialysis, IPD, or medical management with at least a two week patient survival and no intention to return to CAPD or any such transfer considered "temporary" but exceeding 4 weeks (---); and dying or transferring (.....). For all calculations, departures from CAPD for kidney transplantation or recovery of renal function were withdrawn from observation.

Nolph, et al, which appeared in *Kidney International* 28:198–205, 1985, contained an error on page 201 in the Figure 2 legend. The correct information is presented herein.
